1060 Holub 2015 – 1478.5 Holub x Self (4 seeds)

“1060 Holub ’15 Planting Instructions – Only an average of 1 in 4 of these seeds will throw green. To get a green one, plant all the seeds in this pack spaced out in a competition size patch where you would normally plant one plant. Give them all top care through early-mid June. When first females show, pull up and discard yellow or striped-yellow-fruited plants. Keep plants with green-fruited females for a bit longer and then select down to one (only one!) green-fruited keeper plant per patch. Continue top quality care as you would a normal competition plant/fruit.
Good luck!” – Scott Holub
